

THE SATISFACTION FROM 2-YEAR MEDICAL STAFFS TRAINING PROGRAMS SURVEY

¹Chiu HY, ¹Lin PY, ¹Lee SH, ¹Su HC, ¹Chung HC

¹Division Of Primary Care Medicine, The Joint Commission Of Taiwan, Taiwan

Introduction

2-year medical staffs training programs have been sponsored for implementation in teaching hospitals by Ministry of Health and Welfare since July 2007. The coverage rate is approximately 76.5 %.

Methodology

The survey subjects include 16,638 trainees. The 5-point Likert scale was adopted for online survey conducted from 1st October 2013 to 31st October 2013. The questionnaire including five perspectives as following :

1	Work satisfaction	2	Hospital resources
3	Tutor assistance	4	Self-growth
5	Program support		

Results

A total of 10838 trainees deemed that after undergoing the post-graduation 2-year Medical Staffs Training Programs :

- ▶ **85.4%** the clinical practice was effectively improved
- ▶ **84.6%** interactive communication with the group members, patients, or patients' families were facilitated
- ▶ **82.6%** the school education was applied in clinical work
- ▶ **78.6%** reflect that given the chance they would be willing to act as a tutor.

Conclusion

The trainees generally gave positive recognition for the program implementation. The higher degree of satisfaction from the trainees has engaged in the 2-year Post-graduation Medical Staffs Training Programs, the higher the work satisfaction will be.
